## Overview

This document describes the enhancements and modifications included in ACR/Summary<sup>®</sup>, ACR/Detail<sup>®</sup>, and ACR/Instream for Release 9.4.

## ACR/Instream

The following section describes the enhancements for ACR/Instream Release 9.4.

### **Support for processing JSON file types**

ACR/Instream now offers ability to process JSON input file types. The configuration and setting up of definitions is similar to the processing of XML data.

### **XML and JSON Data Dictionary Editor**

Fixed several minor issues related to the display of data in both XML and JSON Data Dictionary Editor Screens.

### **Documentation Updates**

Online Help and Installation guides have been updated to incorporate product changes.

# ACR/Summary and ACR/Detail Enhancements

The following section describes the enhancements that pertain to both ACR/Summary and ACR/Detail.

## New Licensing for ACR/Summary and ACR/Detail

The compiler used by ACR/Summary and ACR/Detail on Windows and Unix/Linux platforms have been updated to use Visual COBOL 5, which is the latest release from Micro Focus.

Users will have to install the new license using the Micro Focus License Manager. Please contact Infogix Support prior to the upgrade to get the license file.

### Procedure to Install the License Manager

The installer to install the license manager is included in ACR 9.4 product installation files. Use `lmsetupx86.msi` for ACR 32-bit version or `lmsetupx64.msi` for ACR 64-bit version.

Run as Administrator, `lmsetupx86.msi` for ACR 32-bit version or `lmsetupx64.msi` for ACR 64-bit version.

Click "Next" by accepting the defaults in subsequent screens in the wizard.

### Procedure to Install the License

Launch "License Administration" from Windows Start Menu > Micro Focus License Manager

From the Install tab, click Browse. Select the license file.

Select "Install Licenses" to install the license.

# ACR/Summary and ACR/Detail System Requirements

## Requirements for z/OS®

Category	Requirement
Operating system	IBM z/OS® 2.2 or higher
ISPF Profile	ISPF profiles are not compatible with releases of ACR/Summary and ACR/Detail older than 3.0.
TSO Region Size	*6144 (7168 suggested), plus space required by LE runtime libraries.
COBOL	Enterprise COBOL 6.1 or any compatible COBOL is required if you wish to compile user exits.
