Overview

The *Insight Release Notes* describe the enhancements and modifications included in Perceive 9.5. This document lists migration concerns, maintenance fixes that may affect your rules if you upgrade from a previous release and known issues.

Follow the instructions in the *Infogix Server Upgrade Guide* to upgrade the server to the new release.

What's New

This section summarizes the enhancements for Insight Release 9.5.

Infogix Assure is now Assure DQ

As part of the Precisely rebranding strategy, Infogix Assure product is now rebranded Assure DQ. Within the user interface, users will see the new Assure DQ naming being used.

Note that there may still be some underlying references to "Infogix Assure", but those have been kept to reduce any issues with the broader backend name dependencies.

Angular Upgrade

In this release, the version of Angular has been upgraded. This update, along with other third-party library upgrades, increase system security and performance.

Fixed in this Release

The following issues have been fixed in this release of Insight.

JIRA	Details
II-10068	Fixed an issue where a null pointer exception is displayed when severity rules of a control are updated.
II-10067	Fixed an issue where the severity rules for ACR/Summary and ACR/Detail controls are set incorrectly for new definitions.

JIRA	Details
II-10063	Fixed an issue where incorrect filtered results may be displayed when the user clicks the breadcrumbs in Views > Control Views to toggle between Aggregates and Executions while the page is still loading.
II-10162	Fixed an issue where a value, empty, is displayed in the Type selection dropdown in the New Custom View Component screen.
II-10056	Fixed an issue where sorting on Last Updated Column returned incorrect results in Custom View Component > Open Custom View component.

Platform Improvements

This section summarizes changes to supported software, new features, and improvements for this release.

New Software Supported

The following is now supported:

- WildFly 24.0.1

The complete list of supported software and hardware versions is included in the *Technical Specifications Document* included in the application documentation.

Java Support

The product has been tested in the following Java environments:

- Amazon Corretto 11 for WildFly 24
- IBM SDK for IBM WebSphere

Library Updates

In this release, several third-party libraries were updated. These updates increase system security and reliability. Several libraries were updated specifically to address security vulnerabilities.

Fixed in this Platform Release

The following issues have been fixed in this release.

JIRA	Details
IP-5515	Fixed an issue where changes to a user's group membership are not becoming effective upon logging in to the application. This is applicable for WildFly deployments only.
IP-5645	Updated log4j to a modified version of 1.2.17 that removes classes for security vulnerabilities CVE-2019-17571 and CVE-2021-4104. Note: This update may impact your logging if you have customized <code>cee.log4j.properties</code> . If you use a customized cee.log4j.properties in your CONFIG_OVERRIDE folder, be sure to copy the components/kernel/conf/cee.log4j.properties to your CONFIG_OVERRIDE folder and re-apply your customizations.

Changes to System Requirements

For current technical specifications, see the Web site:

<http://www.infogix.com/resource/infogix-technical-specifications>

Obtaining Product Updates

Be sure to check for product updates for the 9.5 release. Log on to <http://support.infogix.com> and download any applicable fix packs or patches.

Contact Us

If you encounter any technical issues, we recommend that you visit the support portal at support.infoqix.com.

If your query has not been discussed previously, you can create a new topic and receive answers from our product experts.

Alternatively, you can log a support ticket:

1. Select **Sign in** from the top right corner of the screen.
2. If you have already registered, enter your **Email** and **Password**, then click the **Sign in** button. Or, if you are not a registered support portal user, click **Sign up**.
3. Once you have registered and signed in, select **Submit a request** from the top right corner of the screen.
4. Complete all fields, then click **Submit** at the bottom of the screen.

Community

Our product is constantly evolving and input from you is highly valued. If you have any suggestions, please contact the product team by submitting a feature request on the [Community](#).
