Overview

The *Perceive Release Notes* describe the enhancements and modifications included in Perceive 9.5. This document lists migration concerns, maintenance fixes that may affect your rules if you upgrade from a previous release and known issues.

Follow the instructions in the *Infogix Server Upgrade Guide* to upgrade the server to the new release.

What's New

This section summarizes the enhancements for Perceive Release 9.5.

Infogix Assure is now Assure DQ

As part of the Precisely rebranding strategy, Infogix Assure product is now rebranded as Assure DQ. Within the user interface, users will see the new Assure DQ naming being used.

Note that there may still be some underlying references to "Infogix Assure", but those have been kept to reduce any issues with the broader backend name dependencies.

TIBCO JasperReports Server® Support

Perceive 9.5 is certified with JasperReports Server 7.9. A new license file with an expiration date of January 29, 2023.

Angular Upgrade

In this release, the version of Angular has been upgraded. This update, along with other third-party library upgrades, increase system security and performance.

Fixed in this Release

The following issues have been fixed in this release of Perceive.

JIRA	Details
IVP-4867	Fixed an issue where the values entered for a date field are not cleared in Reports > Report Events screen.

JIRA	Details
IVP-4914	Functionality has been added to change the status of a process that is stuck in "In Process" status to "Failed" status when "Stop" button is clicked. Please note that such processes are marked as "Failed". This will release the locks for the data entity used by this process.
IVP-4956	Fixed an issue where the filtered list of the names of the Data Entities are not returned during the creation of New Data Views.
IVP-4960	Fixed an issue in the New Data View screen where the name of the Data Entity is truncated instead of displaying the full name when the name is long.
IVP-4961	Fixed the validation messages when a value is not specified for the Start Date and End Date fields in Report Events > Report screen.

Platform Improvements

This section summarizes changes to supported software, new features, and improvements for this release.

New Software Supported

The following is now supported:

- WildFly 24.0.1

The complete list of supported software and hardware versions is included in the *Technical Specifications Document* included in the application documentation.

Java Support

The product has been tested in the following Java environments:

- Amazon Corretto 11 for WildFly 24
- IBM SDK for IBM WebSphere

Library Updates

In this release, several third-party libraries were updated. These updates increase system security and reliability. Several libraries were updated specifically to address security vulnerabilities.

Fixed in this Platform Release

The following issues have been fixed in this release.

JIRA	Details
IP-5515	Fixed an issue where changes to a user's group membership are not becoming effective upon logging in to the application. This is applicable for WildFly deployments only.
IP-5645	Updated log4j to a modified version of 1.2.17 that removes classes for security vulnerabilities CVE-2019-17571 and CVE-2021-4104. Note: This update may impact your logging if you have customized <code>cee.log4j.properties</code> . If you use a customized cee.log4j.properties in your CONFIG_OVERRIDE folder, be sure to copy the components/kernel/conf/cee.log4j.properties to your CONFIG_OVERRIDE folder and re-apply your customizations.

Changes to System Requirements

For current technical specifications, see the Web site:

<http://www.infogix.com/resource/infogix-technical-specifications>

Obtaining Product Updates

Be sure to check for product updates for the 9.5 release. Log on to <http://support.infogix.com> and download any applicable fix packs or patches.

Contact Us

If you encounter any technical issues, we recommend that you visit the support portal at support.infogix.com.

If your query has not been discussed previously, you can create a new topic and receive answers from our product experts.

Alternatively, you can log a support ticket:

1. Select **Sign in** from the top right corner of the screen.
2. If you have already registered, enter your **Email** and **Password**, then click the **Sign in** button. Or, if you are not a registered support portal user, click **Sign up**.
3. Once you have registered and signed in, select **Submit a request** from the top right corner of the screen.
4. Complete all fields, then click **Submit** at the bottom of the screen.

Community

Our product is constantly evolving and input from you is highly valued. If you have any suggestions, please contact the product team by submitting a feature request on the [Community](#).
